

High Definition Multimedia Interface Cable

High Speed HDMI cable transfers high definition video and audio from your DVD player to HD TVs, Home theater or other digital AV components without loss of any digital signal.

Higher speed

- Increase its single-link bandwidth to 340 MHz (10.2 Gbps) to support the demands of future HD resolutions, deep color and lossless audio

Deep Color

- Supports 10-bit, 12-bit, and 16-bit (RGB or YCbCr), for stunning rendering of over one billion color. Enables increased contrast ratio

Lossless Audio Formats

- Supports current high-bandwidth uncompressed digital audio, compressed digital formats

Excellent Signal Transfer

- *24K Carat Gold Plated Connectors ensures excellent signal transfer for all types of high definition entertainment devices like HD TVs, blue-ray and DVD players, games consoles and etc.*

MX 2.0
