

Overview

The iTable is no ordinary table – it doubles as an Interactive Whiteboard!

This height-adjustable gadget is so versatile that it can be used in preschools or even boardrooms, as a table AND as an Interactive Whiteboard. Whether horizontal or vertical, iTable provides the right working surface for various activities.

Group work has never been easier – with iTable, users can sit around the table and work directly on it, and moments later flip the table to convert it into a fantastic interactive whiteboard presentation.
